Kier Borromeo. Focused on crafting interactive web experiences. Leading frontend engineering at Stride Labs, Inc.

WORK HISTORY

Stride Labs, Inc. 22-Now

Built the de-facto Liquid Staking protocol for the Cosmos ecosystem. Launched and shaped all of Stride's products like Hyperlane and Stride BGT.

Senior Frontend Engineer

Shogun Labs, Inc. 2019-22

Lead the frontend engineering team for Shogun Page Builder, and later joined to help build Shogun Frontend. Focused on building low-code designer tools for Shopify.

Senior Frontend Engineer

Agentbox 2018-19

Worked on complex, offline-first features with React Native. Built elaborate filter and sort UIs. Pushed initiatives to control complexity and improve performance

Senior Frontend Engineer

TARA.AI 2016-2018

Built an interactive drag and drop project management board application with React; and a responsive contentful website with Jekyll.

Frontend Developer

ONE Network Ecommerce 2015-16

Lead the initiative to transition from Angular to React. Among many projects, built a Shopify-esque marketplace, and student id software for G-Force.

Lead Frontend Developer

Sourcescript Innovations 2014-15

Built the residential software for Nueva Ecija's city hall using Laravel and Angular. Worked on both backend and frontend for multiple client projects.

Web Developer

SKILLS & COMPETENCIES

Frontend Development

Built complex frontend systems in React, involving deeply stateful UIs: from drag-and-drop website builders and design systems to multi-step workflows and multifaceted interfaces

Backend Development

Shipped backend systems with Laravel. Through both professional and side project work, I have hands-on experience with databases, queues, infrastructure, deployments, CI/CD, and site reliability.

Design

My background in design allows me not only build products from the ground up, but also provide invaluable intuition to bring rich optimal user-friendly experiences.

ACHIEVEMENTS

First Runner Up

Philippine Code in the Dark #1

February 2018

Mentor & Speaker

Ateneo Hacks - Intercollegiate Hackathon

January 2015
