Kier Borromeo. Senior Frontend Engineer.
Building thoughtful interfaces for the web.

WORK HISTORY

Stride Labs, Inc. 2022-26

Shaped the frontend of every Stride product, starting with its liquid staking app, the de facto standard in Cosmos. Later pivoted to build an automated trading platform and an AI agent review tool.

Senior Frontend Engineer

Shogun Labs, Inc. 2019-22

Led the frontend for Shogun Page Builder, a drag-and-drop page builder for Shopify stores. Later joined the Shogun Frontend team to build and support its headless storefront platform.

Senior Frontend Engineer

Agentbox 2018-19

Built offline-first features in React Native and an advanced filter and sort system. Addressed architecture gaps so features were easier to build and fast by default.

Senior Frontend Engineer

TARA.AI 2016-2018

Led the frontend at an early-stage AI project management startup, building everything from scratch, from its real-time collaborative board to the company website.

Lead Frontend Developer

ONE Network Ecommerce 2015-16

Led the company-wide move from Angular to React and a shared design system, starting with a rewrite of the store builder. Followed with a multi-vendor marketplace and student ID software for G-Force.

Lead Frontend Developer

Sourcescript Innovations 2014-15

Worked directly with Nueva Ecija's local government to build its resident records and city services software. Took on a wide range of client projects, from consultation to launch.

Web Developer

LEADERSHIP & ACTIVITIES

Leadership

Led by doing. Took ownership of hard problems and built foundations other developers could confidently build on. Turns ambiguous, complex problems into well-defined scope and clear actionable steps.

Projects

Always tinkering and learning. Open-sourced side projects like a watch-party movie platform and a Dota hero organizer for the web. Recently built a photobooth software and a video downloader.

Mentorship

Mentored 5 talented early career professionals: Jiro Ricaro, Peter Ricaro, EJ Llovido, Brian Bodollo, and Kirby Borromeo as they secured roles in Mashup Garage and Inspire Solutions.

Community

Attended Ateneo Hacks as mentor / speaker. First Runner Up in Philippine Code In The Dark #1.

SKILLS & COMPETENCIES

Frontend Development

Built complex, stateful React UIs like drag-and-drop page builders, design systems, and multi-step workflows, shaped by a design background that keeps them intuitive and polished.

Backend Development

Shipped Laravel and Ruby on Rails backends across multiple projects, working with relational databases, background jobs, and backend infrastructure.
