

## WORK EXPERIENCE

### 6/ STRIDE • SENIOR FRONTEND ENGINEER

Built the de-facto Liquid Staking protocol for the Cosmos ecosystem. Launched and shaped all of Stride's products like Hyperlane and Stride BGT.

July 2022 — Present

### 5/ SHOGUN • SENIOR FRONTEND ENGINEER

Lead the frontend engineering team for Shogun Page Builder, and later joined to help build Shogun Frontend. Focused on building low-code designer tools for Shopify.

July 2019 — March 2022

### 4/ AGENTBOX LTD. • SENIOR FRONTEND ENGINEER

Worked on complex, offline-first features with React Native. Built elaborate filter and sort UIs. Pushed initiatives to control complexity and improve performance

March 2018 — February 2019

### 3/ TARA.AI • FRONT-END DEVELOPER

Built an interactive drag and drop project management board application with React; and a responsive contentful website with Jekyll.

Oct 2016 — March 2018

### 2/ ONE • LEAD FRONT-END DEVELOPER

Lead the initiative to transition from Angular to React. Among many projects, built a Shopify-esque marketplace, and student id software for G-Force.

July 2015 — Oct 2016

### 1/ SOURCESCRIPT • WEB DEVELOPER

Worked on both back-end and front-end for multiple client projects.

Aug 2014 — July 2015

## SKILLS & COMPETENCES

### FRONTEND DEVELOPMENT

Built complex frontend systems in React, involving deeply stateful UIs: from drag-and-drop website builders and design systems to multi-step workflows and multifaceted interfaces

### BACKEND DEVELOPMENT

Shipped backend systems with Laravel. Through both professional and side project work, I have hands-on experience with databases, queues, infrastructure, deployments, CI/CD, and site reliability.

### DESIGN

My background in design allows me not only build products from the ground up, but also provide invaluable intuition to bring rich optimal user-friendly experiences.

## ACHIEVEMENTS

### FIRST RUNNER UP

Philippine Code in the Dark #1

February 2018

### MENTOR & SPEAKER

Ateneo Hacks - Intercollegiate Hackathon

January 2015
